

# Municipal Services

Haeger Engineering continues to have a close, working relationship with the Village of Arlington Heights for over 40 years. We have completed a portfolio of projects which include many utility infrastructure improvements and land surveying items within the Village. Our strong relationship with the Village Staff enables efficient, competitive and successful project collaboration.

## Water Distribution and Sewer Improvements

The public infrastructure improvements included topographic surveys, designing final construction plans, calculating cost analyses and project coordination. After the plans were reviewed, approved and awarded, we coordinated with contractors to establish survey control and provided construction staking, guidance and observation.
